 No upcharge for power*

FILM PRODUCTION NOTES

Most importantly, we would love to put together a custom quote for you, since not every project (or **budget**) is the same. Just tell us what you need and we'll create a custom package.

Stage 4 is almost soundproof. But our others are **not soundproof**. With the huge factory windows in Stage 1, that is almost impossible to achieve without wrecking the authentic frames and construction. However, we have had very successful recording done here - it just requires a little finesse. Let us know you wish to capture audio and we will share all of our tips and tricks.

We can accommodate many **unloading trucks** and parked cars inside the building. If you haven't been here before, you really should come by for a visit. This is new since 2019, so even if you have been here before maybe you should come back. Actually super convenient.

Are you **shipping** something to our address? Let us know, so we can be looking out for it. Shipping a LOT to us? Let us know, so we can clear holding areas.

Come by for a tour, meet the team, and see our industrial gem right in the heart of Atlanta.

MISCELLANEOUS
